Registration/Networking

12:30 pm  
Lunch/Program

\$15 Member  
\$25 Non-member

Registration/Cancellation  
Deadline:  
Friday, January 15th

## SUSTAINABILITY ROADMAP

ACEC/CO has been working to develop a sustainability roadmap for Colorado that integrates the sustainability plans for water, transportation, energy and the environment. On October 16, 2009 we held an exploratory meeting at UNC's Monfort School of Business with CDOT, CDPHE, DOLA and the governor's office, a few consulting firms and representatives from higher ed – DU, CSU, and UNC to discuss our proposal.

Since much is happening in the northern area of the state related to energy and sustainability, we would like to discuss with our members of the north the idea of the north being our "sustainability center". We invite you to attend this meeting to learn more. This is an exciting opportunity for engineers to take the lead regarding an integrated sustainability plan.

This is a great opportunity to network with other members in your area. Guests and prospective members are welcome.
