

## **MEMBER FIRM PUBLIC RELATIONS OPPORTUNITY** **Articles due by June 21, 2010**

### **ACEC/CO 2011 *Engineering Colorado* Annual Magazine**

**The focus of this year's publication is sustainability – projects and people making news in the consulting engineering field.**

ACEC/CO is soliciting articles for two sections of the 2011 magazine, listed below, that provide member firms with great opportunities to showcase projects and engineers who are making news in the consulting engineering field, with a focus on sustainability. The publication, for the first time, will be combined with the ACEC/CO annual Membership Directory and published with the October 2010 issue of Mountain States Construction to a distribution of approximately 7,500 developers, owners, architects, engineers, contractors, and agencies in Colorado, Utah, Idaho, Wyoming and Montana.

### **Innovating Engineers Profile**

This section will feature consulting engineers who are making news in sustainability. We are looking for articles, 175 words in length, about an engineer in your firm who demonstrates visionary thinking and creating and/or applying new ideas to projects in the realm of sustainable engineering solutions. **CRITERIA: Engineers must be members of ACEC/CO. Articles should be submitted as word documents, 175 words in length. Photographs of the engineer should be provided in jpeg format, 4 x 5 inches, 300 dpi resolution, color.**

### **Four Corners Sustainable Projects Showcase**

***NOTE: 2010 Engineering Excellence Award and Honor Award winning projects will be featured in a separate section. Firms should NOT resubmit these projects for the Four Corners Showcase.***

ACEC/CO is dedicated to providing visibility for member firms across the state. This section will feature projects statewide that demonstrate how sustainable practices have been incorporated into engineering solutions. We are requesting 250 word articles be submitted accompanied by two photographs that illustrate sustainable aspects of the project. We encourage projects in transportation, water, wastewater, virtually all disciplines of engineering that demonstrate how consulting engineers are incorporating sustainable practices into all types of projects. **CRITERIA:** Articles should be submitted as word documents, 250 words in length. Two photographs of the project should be provided in jpeg format, 4 x 5 inches, 300 dpi resolution, color.

**Please forward your articles and photographs to Robyn Curtis at ACEC/CO by June 21, 2010 via email at [robyn@acec-co.org](mailto:robyn@acec-co.org)**

**For questions regarding the articles please contact ACEC/CO PR Consultant Adrienne Thiele Dallagiacoma at (303) 971-0134 or by email at [athiele@ulicreative.com](mailto:athiele@ulicreative.com).**
